NARRATIVE FOR PLANNING INFORMATION

This report contains Annual Planning Information for Program Year 1990-1991. We have not included the 1980 Census tables which we previously have had in our Planning Information. If any of our readers have a need for that information, we will be happy to supply it.

Population Estimates for 1990 are from the Department of Rural Sociology of Texas A&M University. These projections are by county which we have aggregated into Service Delivery Areas. The estimates for 1990 which we used were from the middle scenario which assumes half the migration rate that took place during the Seventies.

Tables of Population and Labor Force Status by Age, Sex and Race are given for 1990. The population projections again are from A&M, the labor force projections from TEC. These projections are by sex, age, and race (ethnicity). Again we have used three breakouts: Anglo and Other, Black, and Hispanic. Although we realize that "Hispanic" is not a race, most of us in Texas find it more meaningful to have this group broken out from Anglos. The "Other Races" group is very small, and their characteristics are more similar to the Anglo group than to any other.

Labor Force Estimates for the SDA's are given for 1980 through August 1989. Data for component counties are available upon request.

Annual Average Covered Employment, the number of people employed in firms covered by the Texas Unemployment Compensation Act, is given for each SDA for 1986, 1987, and 1988. Data for the first quarter of 1989 is included. After the first of January, data for the second quarter will be available and will be furnished to interested parties upon request. The introduction of the 1987 revision to the Standard Industrial Classification Manual changed some industry codes, particularly in Manufacturing, Finance, and Services. These changes make year-to-year comparisons difficult in some few industries. In these cases, it is suggested that you look to major groups because they were not affected.

Covered Employment and Wage by Industry and County contains similar information for all Texas counties and is available upon request.

Average Weekly Wage in Covered Employment is based on the aforementioned tabulation and is done by industry for the SDA. For the individual counties, the average weekly wage is computed only for total covered employment.

Using Covered Employment in 1985 as a base, *Projections to 1995 by Occupation and by Industry* were made.

The *3-Digit Distribution of 2-Digit Industries* gives a better idea of the type of activity going on in the SDA.

The *Affirmative Action Tables* included distribute current county labor force statistics by sex and race based on 1980 Census ratios.

Characteristics of the Insured Unemployed, current and a year ago, gives the number of claimants in each occupation and industry now compared with the same time last year. Copies of the current reports for the individual counties may give further information on conditions within each SDA.

NARRATIVE (continued)

Recent data on *Per Capita Income* from the Bureau of Economic Analysis of the U. S. Department of Commerce is furnished for 1986 and 1987 for each county. No attempt was made to give an SDA total in multi-county areas.

Estimates of the *Poverty Population for 1990* are given. These estimates were made using the projected 1990 population and a ratio derived from the relationship of the Texas poverty rate to the National rate. These were further refined by the relationship of the SDA poverty rates by race with the State rate in 1979.

The Texas Department of Human Services supplied data on *Aid to Families with Dependent Children* by county, from which we aggregated the SDA totals.

The tables on *Applicants and Nonagricultural Job Openings* by office are available from an internal TEC reporting system.

If you need further information in planning for your 1990-1991 Program Year, please feel free to contact us.

NOTE: Data for 1988 are not strictly comparable to prior years' data due to the 1987 SIC Code restructuring. Among those industries primarily affected by these changes were: SIC's 30, 32, 36, 38, 60, 61, 66, 72, 73, 78, 79, 87 and 89. These changes occurred to varying degrees within different SIC's. The most obvious changes were in SIC 66 (which was deleted) and SIC 87 (which was newly-created).

SOURCE: Employment reported to TEC by all employers covered by the Texas Unemployment Compensation Act.

*Less than 3 firms in industry, or 2 firms have 80% of employment in industry.

SOURCE: Bureau of Economic Analysis, U. S. Department of Commerce.

Data are derived by dividing total personal income by Census Bureau population estimates.

NOTE: Abnormally large changes can result from small population fluctuations in sparsely populated counties; from sharp swings in agricultural production; or from business expansions or contractions.

Prepared July 1989

70% OF UPDATED LOWER LIVING STANDARD INCOME LEVELS BY FAMILY SIZE

Metropolitan areas are defined as urban places of 50,000 or more population. All jurisdictions within Metropolitan Statistical Areas (MSAs) regardless of size are considered metropolitan areas.

Non-metropolitan areas are defined as places with less than 50,000 persons which are outside MSAs.

NARRATIVE FOR PLANNING INFORMATION

This report contains Annual Planning Information for Program Year 1990-1991. We have not included the 1980 Census tables which we previously have had in our Planning Information. If any of our readers have a need for that information, we will be happy to supply it.

Population Estimates for 1990 are from the Department of Rural Sociology of Texas A&M University. These projections are by county which we have aggregated into Service Delivery Areas. The estimates for 1990 which we used were from the middle scenario which assumes half the migration rate that took place during the Seventies.

Tables of Population and Labor Force Status by Age, Sex and Race are given for 1990. The population projections again are from A&M, the labor force projections from TEC. These projections are by sex, age, and race (ethnicity). Again we have used three breakouts: Anglo and Other, Black, and Hispanic. Although we realize that "Hispanic" is not a race, most of us in Texas find it more meaningful to have this group broken out from Anglos. The "Other Races" group is very small, and their characteristics are more similar to the Anglo group than to any other.

Labor Force Estimates for the SDA's are given for 1980 through August 1989. Data for component counties are available upon request.

Annual Average Covered Employment, the number of people employed in firms covered by the Texas Unemployment Compensation Act, is given for each SDA for 1986, 1987, and 1988. Data for the first quarter of 1989 is included. After the first of January, data for the second quarter will be available and will be furnished to interested parties upon request. The introduction of the 1987 revision to the Standard Industrial Classification Manual changed some industry codes, particularly in Manufacturing, Finance, and Services. These changes make year-to-year comparisons difficult in some few industries. In these cases, it is suggested that you look to major groups because they were not affected.

Covered Employment and Wage by Industry and County contains similar information for all Texas counties and is available upon request.

Average Weekly Wage in Covered Employment is based on the aforementioned tabulation and is done by industry for the SDA. For the individual counties, the average weekly wage is computed only for total covered employment.

Using Covered Employment in 1985 as a base, *Projections to 1995 by Occupation and by Industry* were made.

The *3-Digit Distribution of 2-Digit Industries* gives a better idea of the type of activity going on in the SDA.

The *Affirmative Action Tables* included distribute current county labor force statistics by sex and race based on 1980 Census ratios.

Characteristics of the Insured Unemployed, current and a year ago, gives the number of claimants in each occupation and industry now compared with the same time last year. Copies of the current reports for the individual counties may give further information on conditions within each SDA.

Recent data on *Per Capita Income* from the Bureau of Economic Analysis of the U. S. Department of Commerce is furnished for 1986 and 1987 for each county. No attempt was made to give an SDA total in multi-county areas.

Estimates of the *Poverty Population for 1990* are given. These estimates were made using the projected 1990 population and a ratio derived from the relationship of the Texas poverty rate to the National rate. These were further refined by the relationship of the SDA poverty rates by race with the State rate in 1979.

The Texas Department of Human Services supplied data on *Aid to Families with Dependent Children* by county, from which we aggregated the SDA totals.

The tables on *Applicants and Nonagricultural Job Openings* by office are available from an internal TEC reporting system.

If you need further information in planning for your 1990-1991 Program Year, please feel free to contact us.

NOTE: Data for 1988 are not strictly comparable to prior years' data due to the 1987 SIC Code restructuring. Among those industries primarily affected by these changes were: SIC's 30, 32, 36, 38, 60, 61, 66, 72, 73, 78, 79, 87 and 89. These changes occurred to varying degrees within different SIC's. The most obvious changes were in SIC 66 (which was deleted) and SIC 87 (which was newly-created).

SOURCE: Employment reported to TEC by all employers covered by the Texas Unemployment Compensation Act.

*Less than 3 firms in industry, or 2 firms have 80% of employment in industry.

SOURCE: Bureau of Economic Analysis, U. S. Department of Commerce.

Data are derived by dividing total personal income by Census Bureau population estimates.

NOTE: Abnormally large changes can result from small population fluctuations in sparsely populated counties; from sharp swings in agricultural production; or from business expansions or contractions.

Prepared July 1989

70% OF UPDATED LOWER LIVING STANDARD INCOME LEVELS BY FAMILY SIZE

Metropolitan areas are defined as urban places of 50,000 or more population. All jurisdictions within Metropolitan Statistical Areas (MSAs) regardless of size are considered metropolitan areas.

Non-metropolitan areas are defined as places with less than 50,000 persons which are outside MSAs.
